

Vision and Mission of Petroleum Engineering Program

Vision

Creating a pioneering generation in petroleum engineering, committed to ethics, able to compete professionally and in the field of applied research to serve the community locally and internationally, and keeping pace with technological progress with a promising vision.

Mission

Creating a new generation of innovative and applied petroleum engineers who focus on research to meet regional and global challenges through high-quality educational programs, active participation in community service and entrepreneurship, and committed to ethical standards.

Ethics

1. Upholding professional integrity.
2. Advancing knowledge through research.
3. Serving communities and organizations.
4. Ensuring honesty and transparency.
5. Respecting diversity and individual rights.

Program Educational Objectives

- PE01.** Have the skill of applying appropriate, professional and ethical engineering methods in petroleum engineering.
- PE02.** Be able to participate in professional development initiatives to learn new skills and explore adaptable career options in petroleum engineering.
- PE03.** Participates in volunteer work within the community to enhance leadership skills.
